

“Over 90 percent of homes in the First Nations community of Pikangikum don't have plumbing or access to clean running water.”

**I pledge to help
change that.**

Water is important.

We need water for food, drinking and cleaning. Over 90 percent of homes in the First Nations community of Pikangikum don't have plumbing or access to clean running water. That's awful!

In 2007, the government promised to invest \$46 million to install running water in Pikangikum, connect the community to the power grid, and upgrade the school. That promise has not been fulfilled. This needs to be a priority!

I am joining Lutheran and Anglican youth across Canada in supporting everyone's right to clean water. I add my name to the list of Canadians asking our government to support the basic rights of the people of Pikangikum.

Thank you.
